

Innovation Booster

From Visibility - Speed - Efficiency
to higher Sustainability
in Network Industries
Logistics - Transportation - Energy

What we offer... Original source: <https://www.ajps.ch>

Consultancy Service offer

Cross-industry innovation in network industries:
Logistics - Transportation - Energy

- Strategic and transformational consultancy
- Research consultancy

Projects and Studies

Dynamic market changes and uncertain conditions demand in-depth understanding of the subject and experience. Projects and studies can be undertaken at your pace to support you in

- Introducing/establishing new technological innovation, processes, systems in your organization.
- Making strategic and operational choices, and implementing these in the organization.

Achieving higher Sustainability Goals with Ideal Collaboration

Do you have strategic and transformational needs to address your goals for sustainability such as

- Accessing new national and international markets for economic benefits
- Optimizing resources and asset utilization
- Harmonizing cross border processes
- Ensuring compliance to social conditions
- Reducing CO2 emissions
- Looking for strategies and best practices in this regard

Efficiency in Operations through Digitalization and Automation

Do you aim to develop or formulate a roadmap or a transition/maturity model for

- Improving processes in your organization
- Keeping customers informed in real time
- Speeding up matching of demand to services
- Upgrading capabilities of your organization
